

# WASHOE

Regional Mapping System

**Every application must include a project map.**

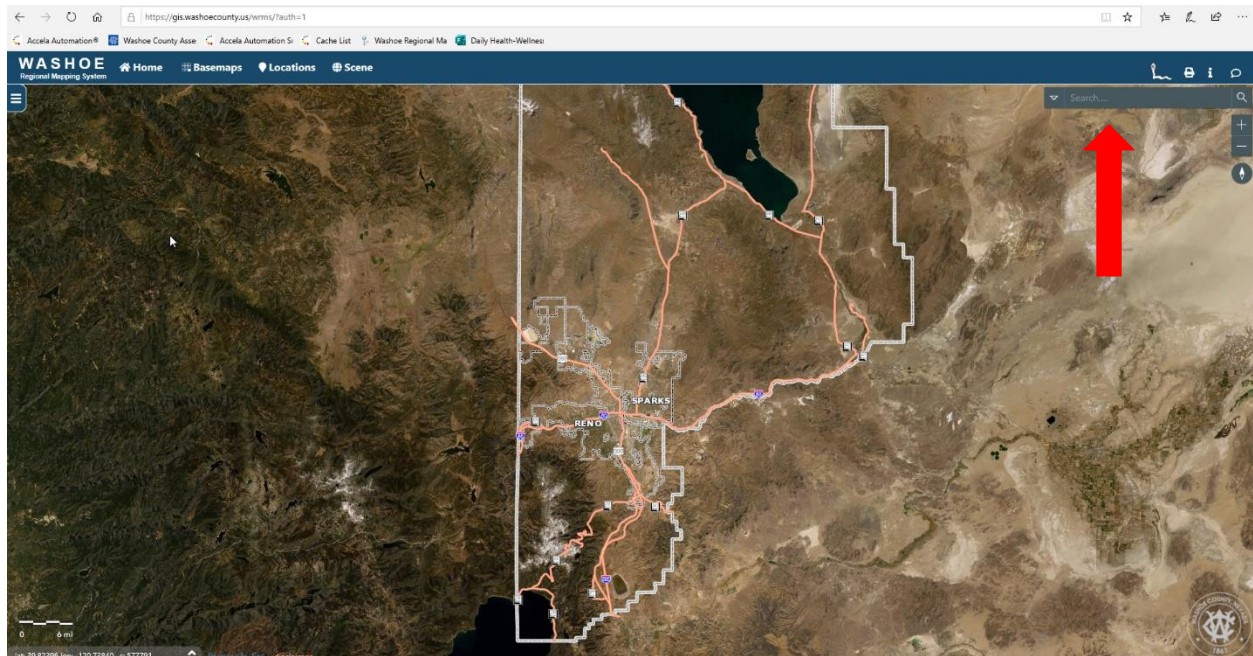

The AQMD requires Assessor's Parcel Maps or a highlighted aerial if the project is in a remote location. The project boundaries and/or location must be clearly identified, and for linear portions of the project, the length and width of the disturbance must be given. The AQMD does not accept engineering drawings for project maps.

### **Assessor's Parcel Maps**

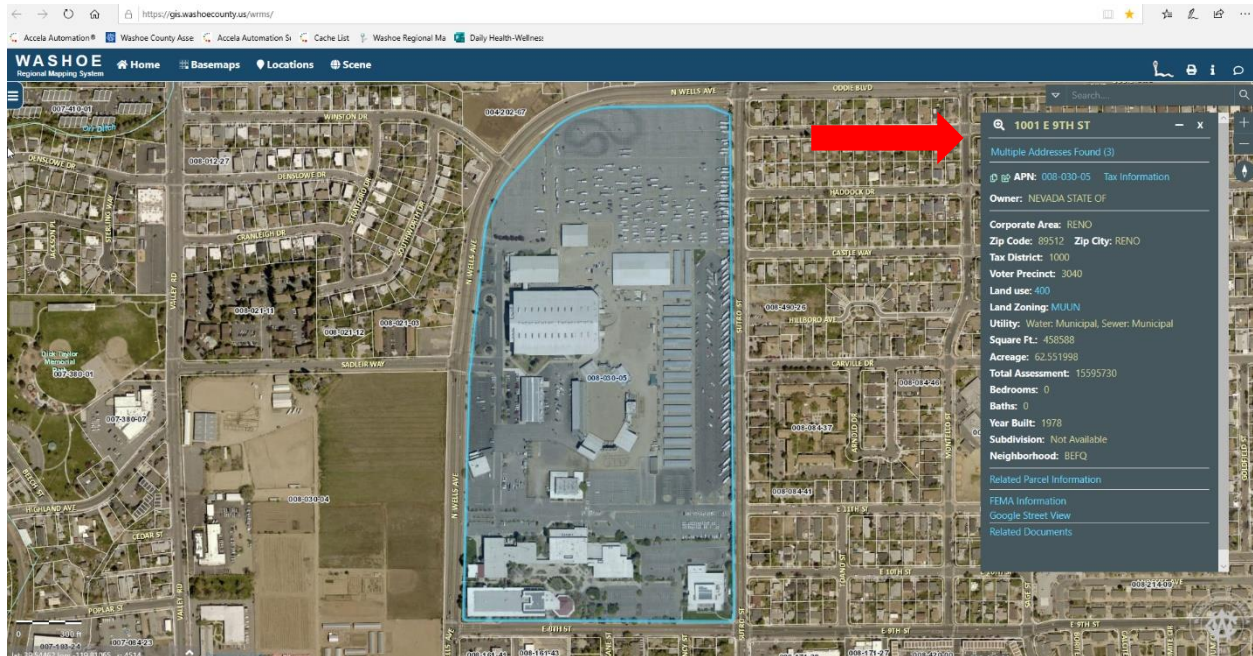

o Go to the Washoe County Regional Mapping System website in the GIS mapping area

<https://gis.washoecounty.us/wrms/>

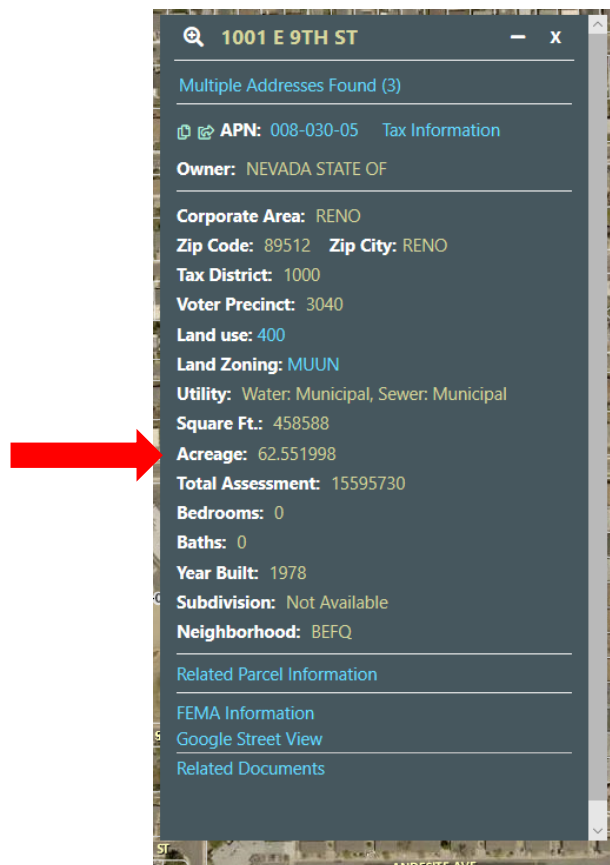

o Use the Search option to find your parcel.

o Click on your parcel and the owner's information window will populate.

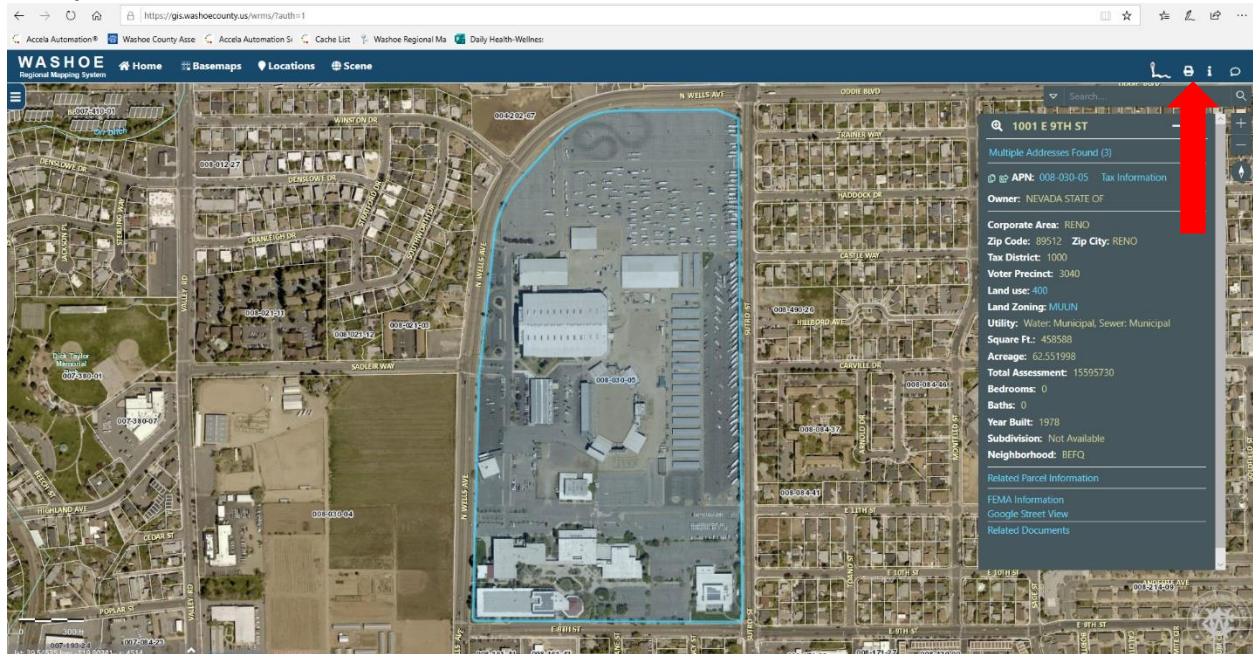

o Acreage for the whole parcel is on this screen.

o Click Assessor's Parcel Map (see example below), then click Print by selecting the printer icon, select the Print Size and orientation; i.e. 8.5" x 11" landscape or portrait. Use a pen to mark out the project work area. It is important to center the desired content. **Map size and contents may appear differently on export.**

## Export Map

[Export Screen Shot as Image](#)

IMPORTANT: Center desired content. Map size and contents may appear differently on export. Please disable pop-up blocker for print function.

Title for Print

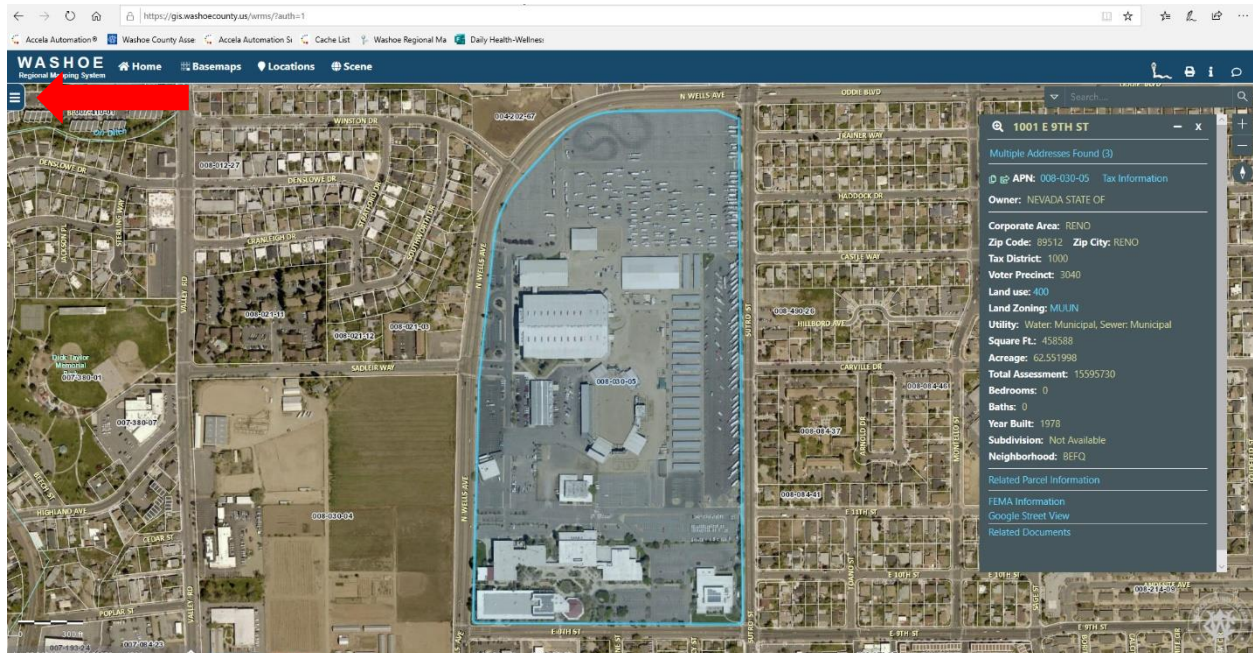

Select Print Size

- ☐ Portrait - 8.5 x 11.0 in
- ☒ Landscape - 11.0 x 8.5 inch
- ☐ Portrait - 11.0 x 17.0 in
- ☐ Landscape - 17.0 x 11.0 in

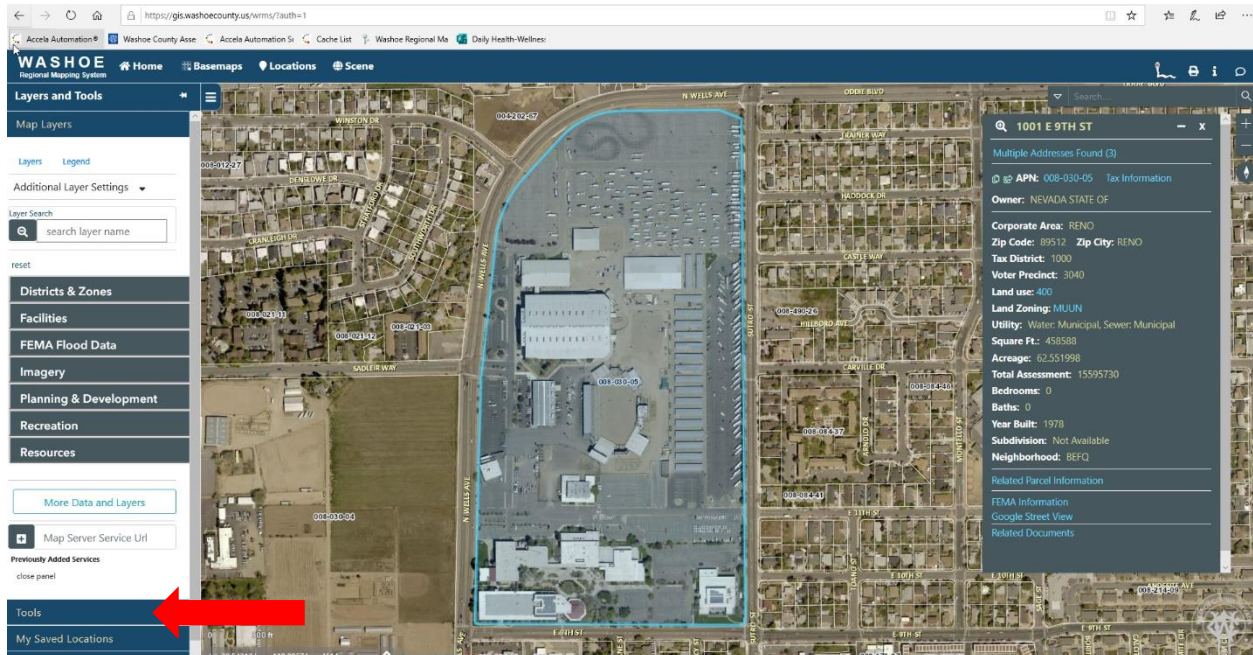

If you do not see the print click this link for print result

[Export for Print](#)

o You may also use the tools associated with the Washoe Regional Mapping System. To select the tools, click the triple bar on the left side of the screen

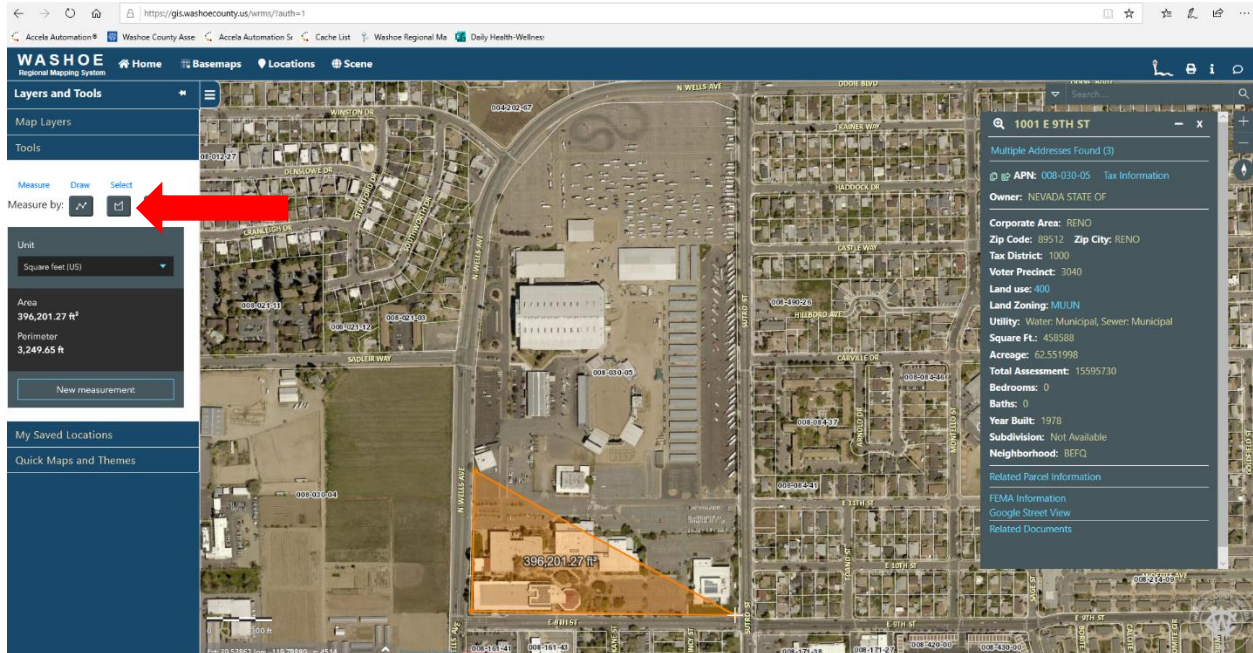

o Select the Tools menu at the bottom of the tool bar on the left-hand side of the screen.

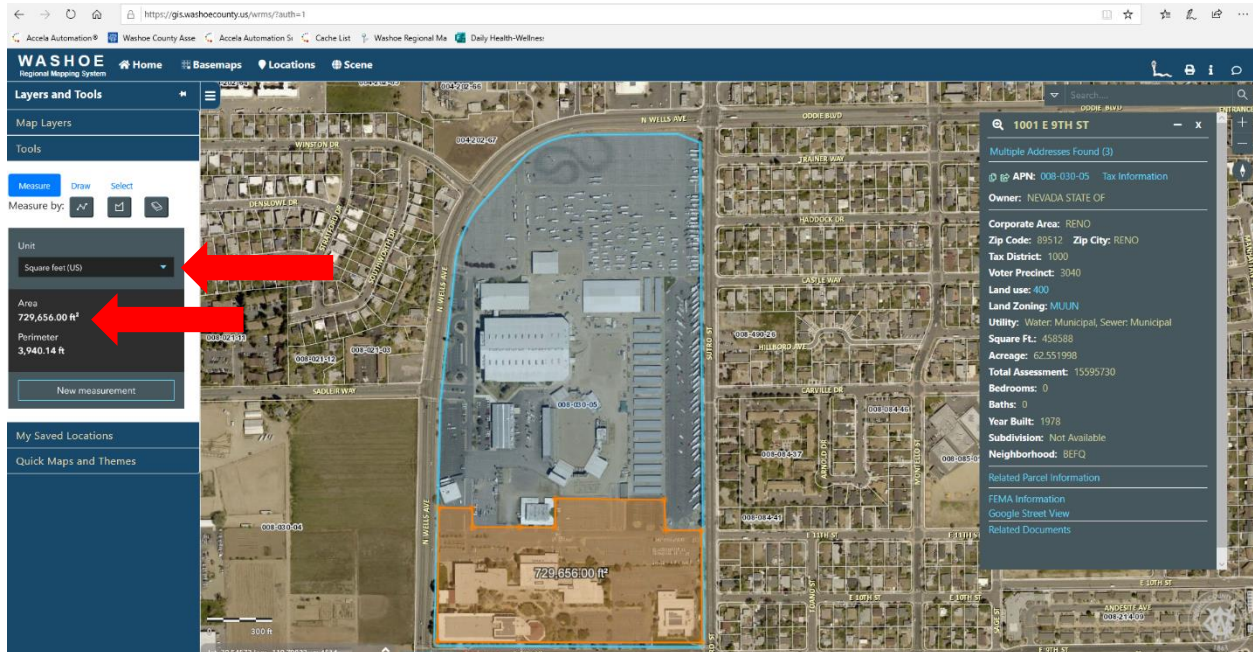

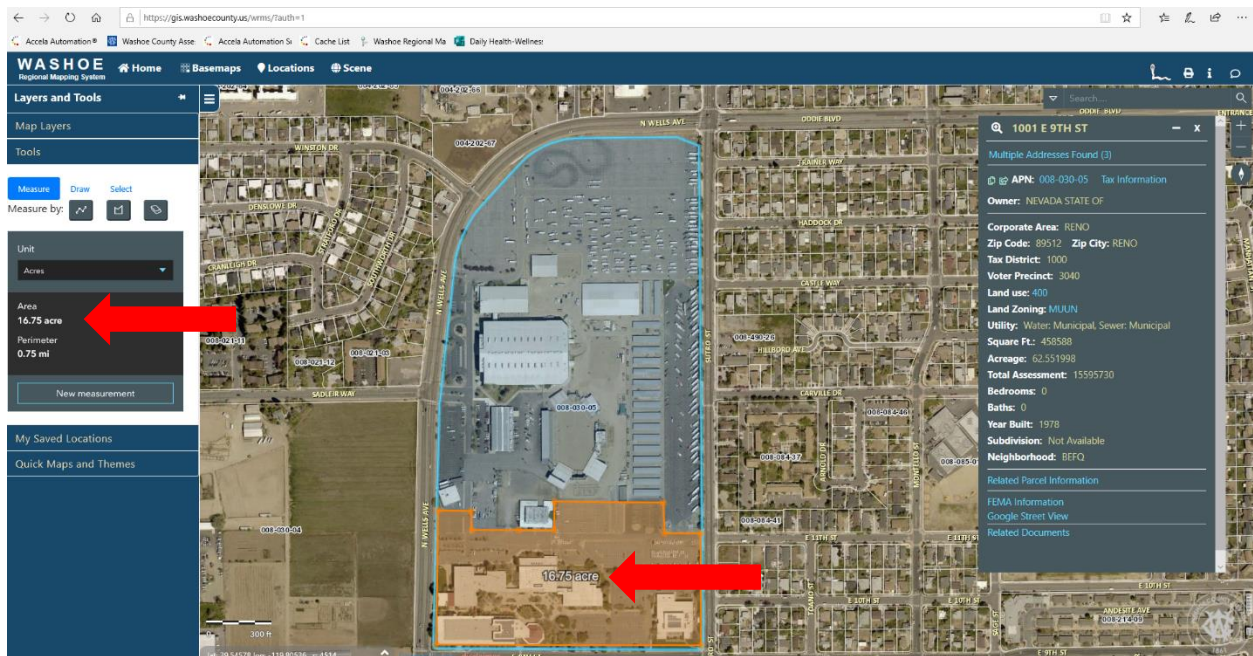

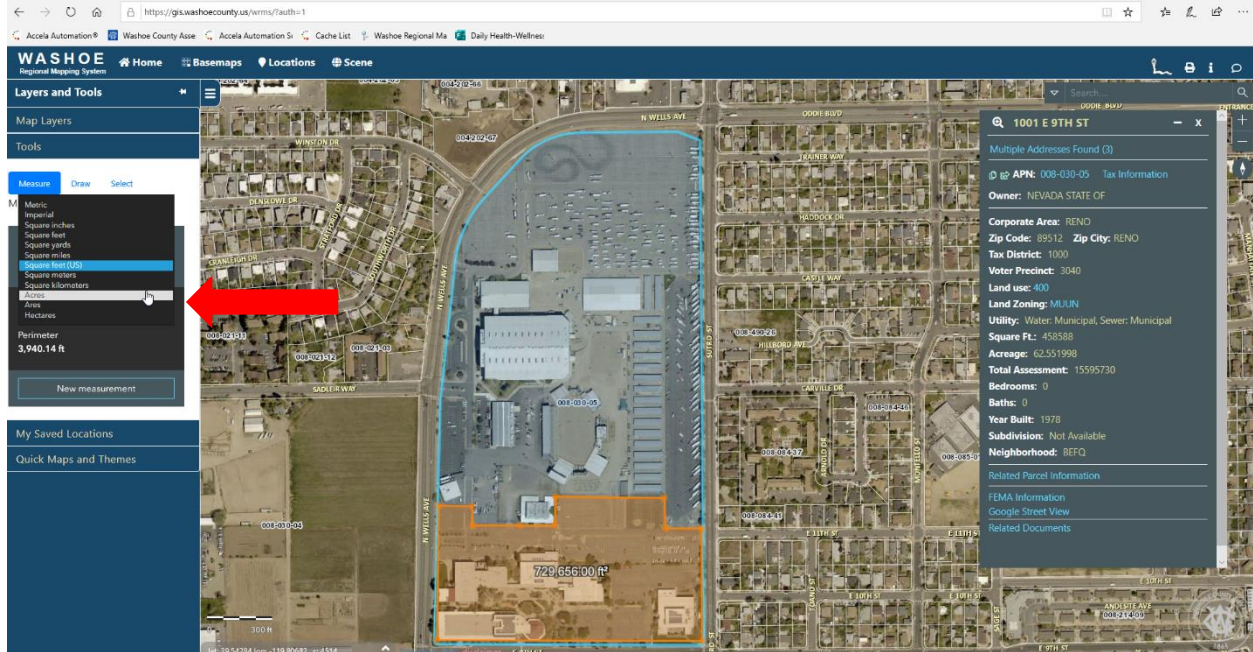

o A tool bar will appear with 'Measure', 'Draw' and 'Select' as the options. If you select 'Measure' you can draw a polygon around the whole parcel or the part of the parcel that will be associated with the Dust Control Permit. Double-click the last point of the polygon to finish the shape of the disturbed area for the Dust Control Permit.

o Once the polygon is complete, the area will be measured in square feet. Using the 'Unit' drop down menu, the measurement can be changed to acres.

o Click Print by selecting the printer icon in the upper right corner, select the Print Size and orientation; i.e. 8.5" x 11" landscape or portrait. It is important to center the desired content. **Map size and contents may appear differently on export. You can close the 'Export Map' window and reposition/resize the map that was created until a desired map is exported. The map can be saved as a PDF and submitted online through Accela as part of the application.**
